Wall Street Associates, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Wall Street Associates, LLC has not been independently verified.

Wall Street Associates, LLC (“The Firm”, “WSA”) is a registered investment advisor, established in 1987. WSA is defined as an independent investment advisory firm that is not affiliated with any parent organization. The Firm is defined as all actual, institutional and sub-advisory (mutual fund) accounts managed by WSA. WSA invests primarily in U.S. Micro to Mid Cap growth securities for U.S. institutional clients. WSA maintains a complete list and description of composites, which is available upon request.

Mid Cap Growth Composite (“The Composite”) was created in September of 1992. The Composite includes all actual fee paying, tax-exempt institutional and sub advisory (mutual fund) accounts with comparable investment objectives and risks, managed by WSA for at least one full month. Investment Guidelines: the Composite invests primarily in domestic growth equities with a market capitalization from \$1.5b to \$10b (gross) at purchase, including benchmark constituents above \$10b. It is measured against the Russell Mid Cap Growth Index for comparison purposes. The Russell Mid Cap Growth Index returns, which do not reflect the deduction of advisory fees, have been provided for comparison purposes only and have not been examined by independent accountants. Russell Midcap Index measures the performance of the 800 smallest companies in the Russell 1000 Index, which represent approximately 35% of the total market capitalization of the Russell 1000 Index. Russell Midcap Growth Index measures the performance of those Russell Midcap companies with higher price-to-book ratios and higher forecasted growth values. The stocks are also members of the Russell 1000 Growth index. Market capitalization for Russell Mid Cap Growth Index constituents ranged from a low of \$1.2B to a high of \$22.1B as of 12/31/10. The index is not available for direct investment. Russell Investment Group owns the Russell Index data, including all applicable trademarks and copyrights, used by WSA in these materials. This presentation may contain confidential and any unauthorized use or redistribution is strictly prohibited. Russell Investment Group is not responsible for the configuration of this material or for any inaccuracy in WSA’s presentation thereof. The Mid Cap Growth Composite’s results have been prepared and presented in compliance with Global Investment Performance Standards for the period January 1, 1993 through December 31, 2010. Prior to April 1995, non-fee-paying clients represented 100% of the Mid Cap Growth Composite; therefore the net returns for those periods reflect what a fee-paying client would have paid, based on actual assets managed.

The US Dollar is the currency used to express performance. Results are based on fully discretionary, tax-exempt accounts under management, including those accounts no longer with the firm. Performance information reflects total return and includes dividends and other earnings. There is no minimum account size for this composite.

Returns were calculated on a total return basis. Returns include all dividends and interest, other income, realized and unrealized gains or losses, and are net of all brokerage commissions, execution costs and without provision for federal or state income taxes. Securities transactions are accounted for on trade date, with dividends and other earnings accounted for on a cash basis. Cash and equivalents are included in performance returns. Monthly returns of The Composite combine individual accounts’ return (calculated on a time-weighted rate of return basis which is revalued daily) by asset-weighting each accounts asset value as of the beginning of the month. Annual returns are calculated by geometrically linking the monthly returns. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Gross returns do not give effect to investment advisory fees, which would reduce such returns. Net of fee performance reflects deduction of the weighted average fee rate of the previous quarters actual investment advisory fees, as provided in Part II of the Firm’s ADV. For example, gross performance of 10.00% combined with a 1.00% management fee would produce net performance of 9.00% (approx.). The management fee schedule is as follows: 0.80% on the first \$50mm; 0.70% on the next \$50mm; 0.60% thereafter. Actual investment advisory fees incurred by clients may vary due to various conditions including account size. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year.

From time to time, WSA may invest some client accounts in shares of companies through initial public offerings (“IPOs”). IPOs have the potential to produce substantial gains. There is no assurance that any client account will have continued access to profitable IPOs and as account assets grow, the impact of an IPO investment in that account may decline. Investors should not rely on these past gains as an indication of future performance.

No leverage or derivatives are used in this product. Disclosures are the representation of management. Performance results shown above are included as part of a complete disclosure presentation.

Past performance is not indicative of future returns. Results will vary among client accounts. The actual return and value of an account will fluctuate and at any point in time could be worth more or less than the amount invested.
